8 June 1977

MEMORANDUM FOR: Deputy Director for Administration

FROM : Paul V. Walsh
Associate Deputy Director for Intelligence

SUBJECT : Telephone Survey Recommendations

REFERENCE : Memo from D/OS to DDA, dtd 18 May 1977, same subject

1. The Office of the Deputy Director for Intelligence supports the recommendations of the Telephone Survey Study Group, subject to the following caveat. The Office of Central Reference now makes extensive use of the employee names and mailing addresses currently listed in the Agency Combined Telephone Directory. OCR is in daily receipt of large quantities of regular and interagency mail addressed simply, "John Doe, CIA." At present, the Combined Telephone Directory serves as locator for these persons. Our endorsement is made subject to the availability of a successor document or register that would meet this functional requirement. Such a register should be tightly controlled and, of course, carefully screened for cover and other security considerations.

2. We strongly support the recommendations on tighter control and accountability as well as the reduction of the large number of copies of the Combined Telephone Directory now being published.

Paul V. Walsh
